

Java Object in to sequence of bytes

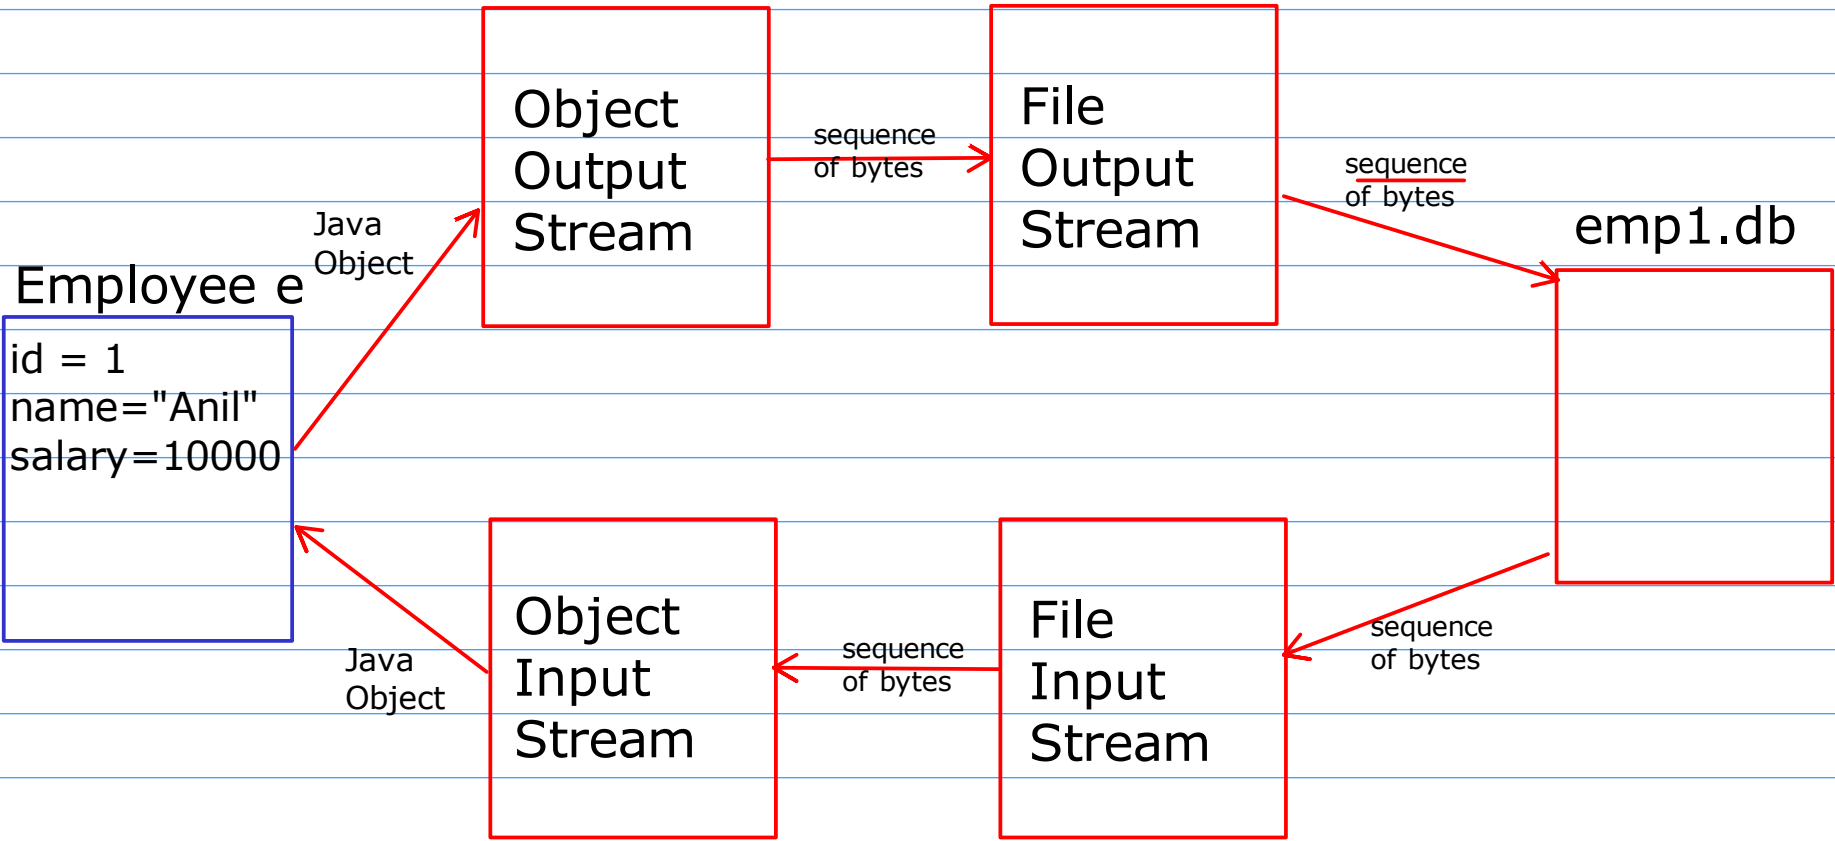

```
FileOutputStream fos = new FileOutputStream("emp1.db");
```

Absolute
Relative

```
DataOutputStream dos = new DataOutputStream(fos);
```

```
FileInputStream fis = new FileInputStream("emp1.db");  
DataInputStream dis = new DataInputStream(fis);
```

```
FileOutputStream fos = new FileOutputStream("emp1.db");
```

```
ObjectOutputStream oos = new ObjectOutputStream(fos);
```

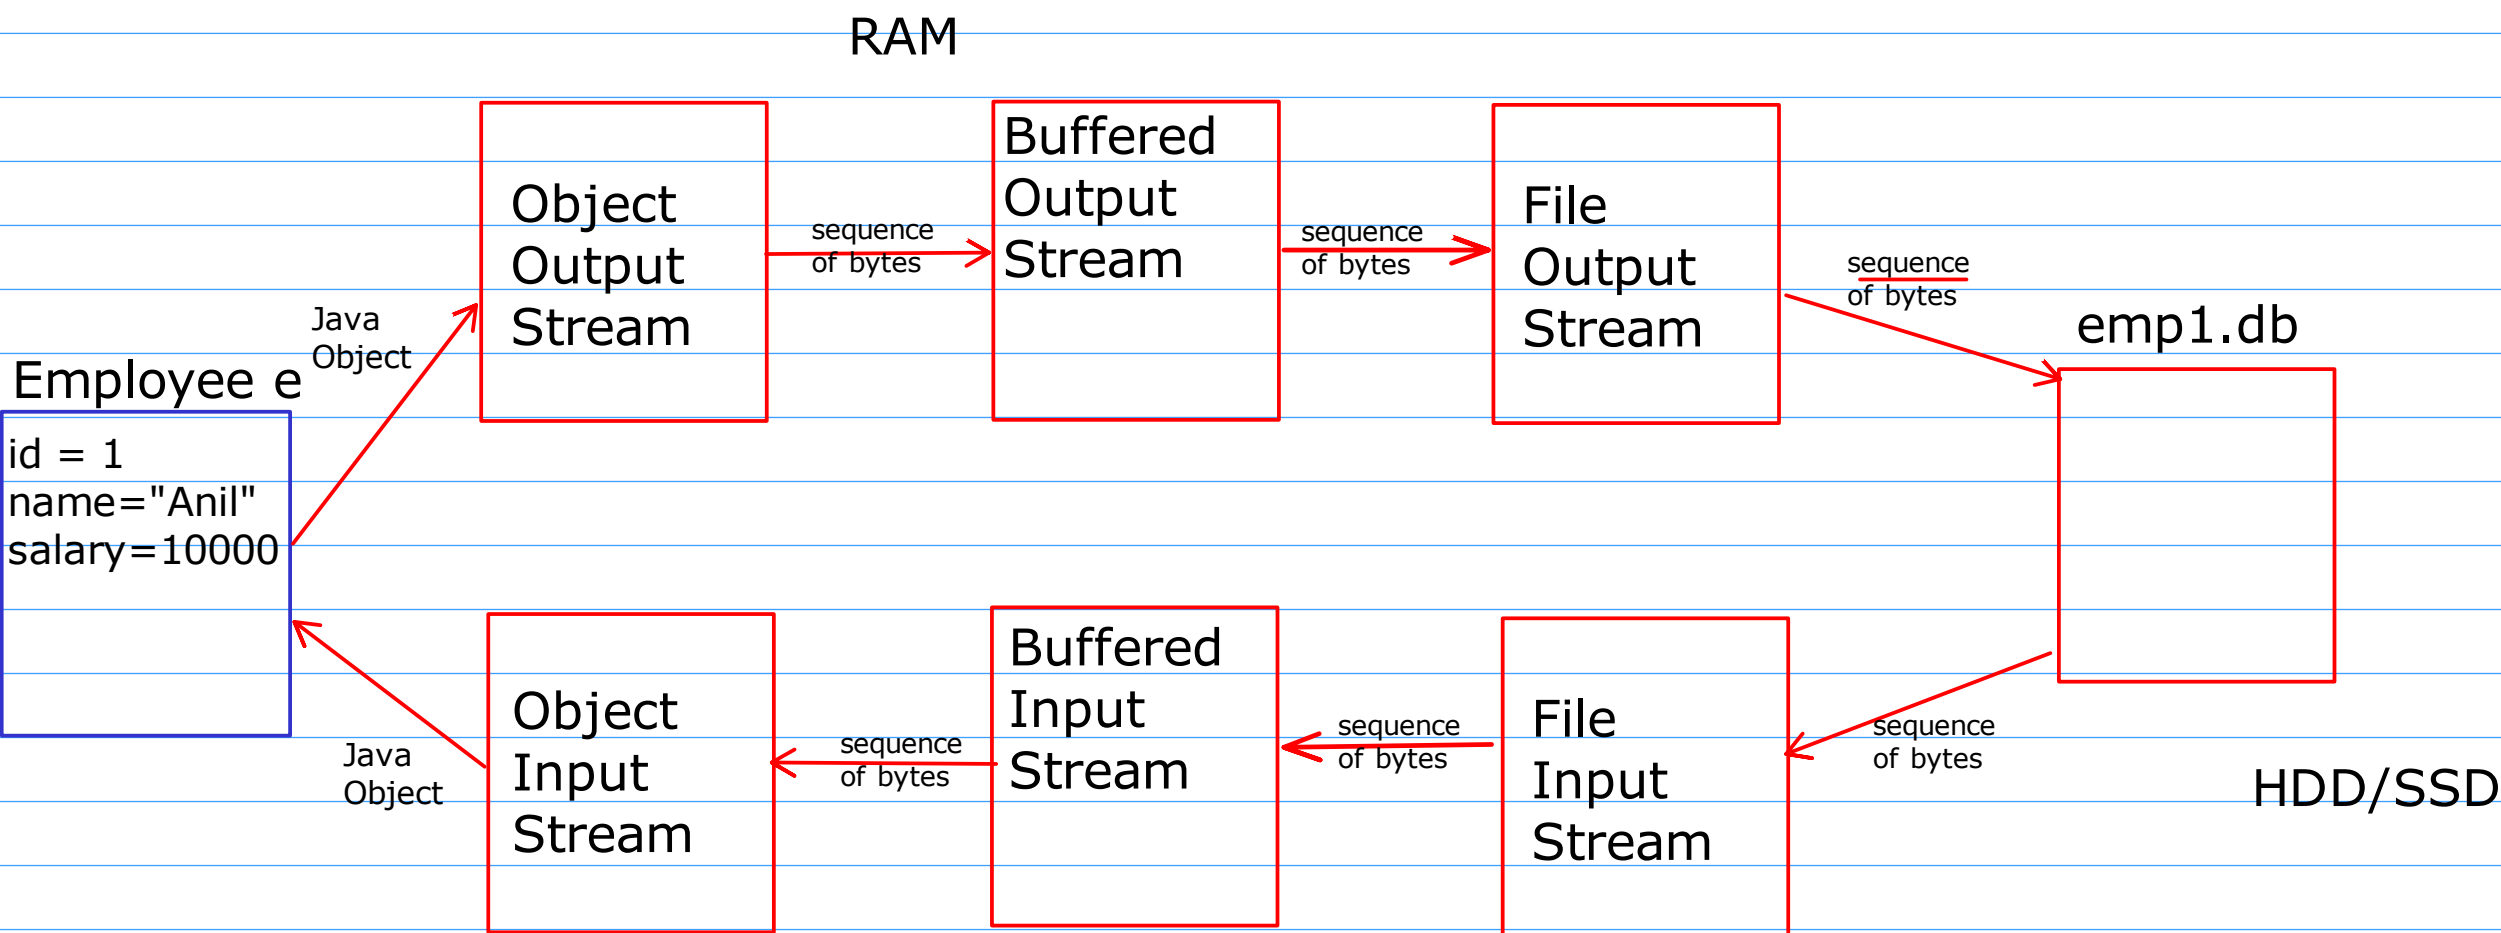

```
FileInputStream fis = new FileInputStream("emp1.db");  
ObjectInputStream ois = new ObjectInputStream(fis);
```

Seralization

- A process of converting the state of an object into sequence of bytes is called as Serilization

Deserialization

- A process of converting the stream of bytes into the Object is called as Deserialization

```
FileOutputStream fos = new FileOutputStream("emp1.db");
```

```
BufferdOutputStream bos = new BufferedOutputStream(fos);
```

```
ObjectOutputStream oos = new ObjectOutputStream(bos);
```

```
FileInputStream fis = new FileInputStream("emp1.db");
```

```
ObjectInputStream ois = new ObjectInputStream(fis);
```
