

Class -> DS

Method ->

Interfaces ->

Comparable

Comparator

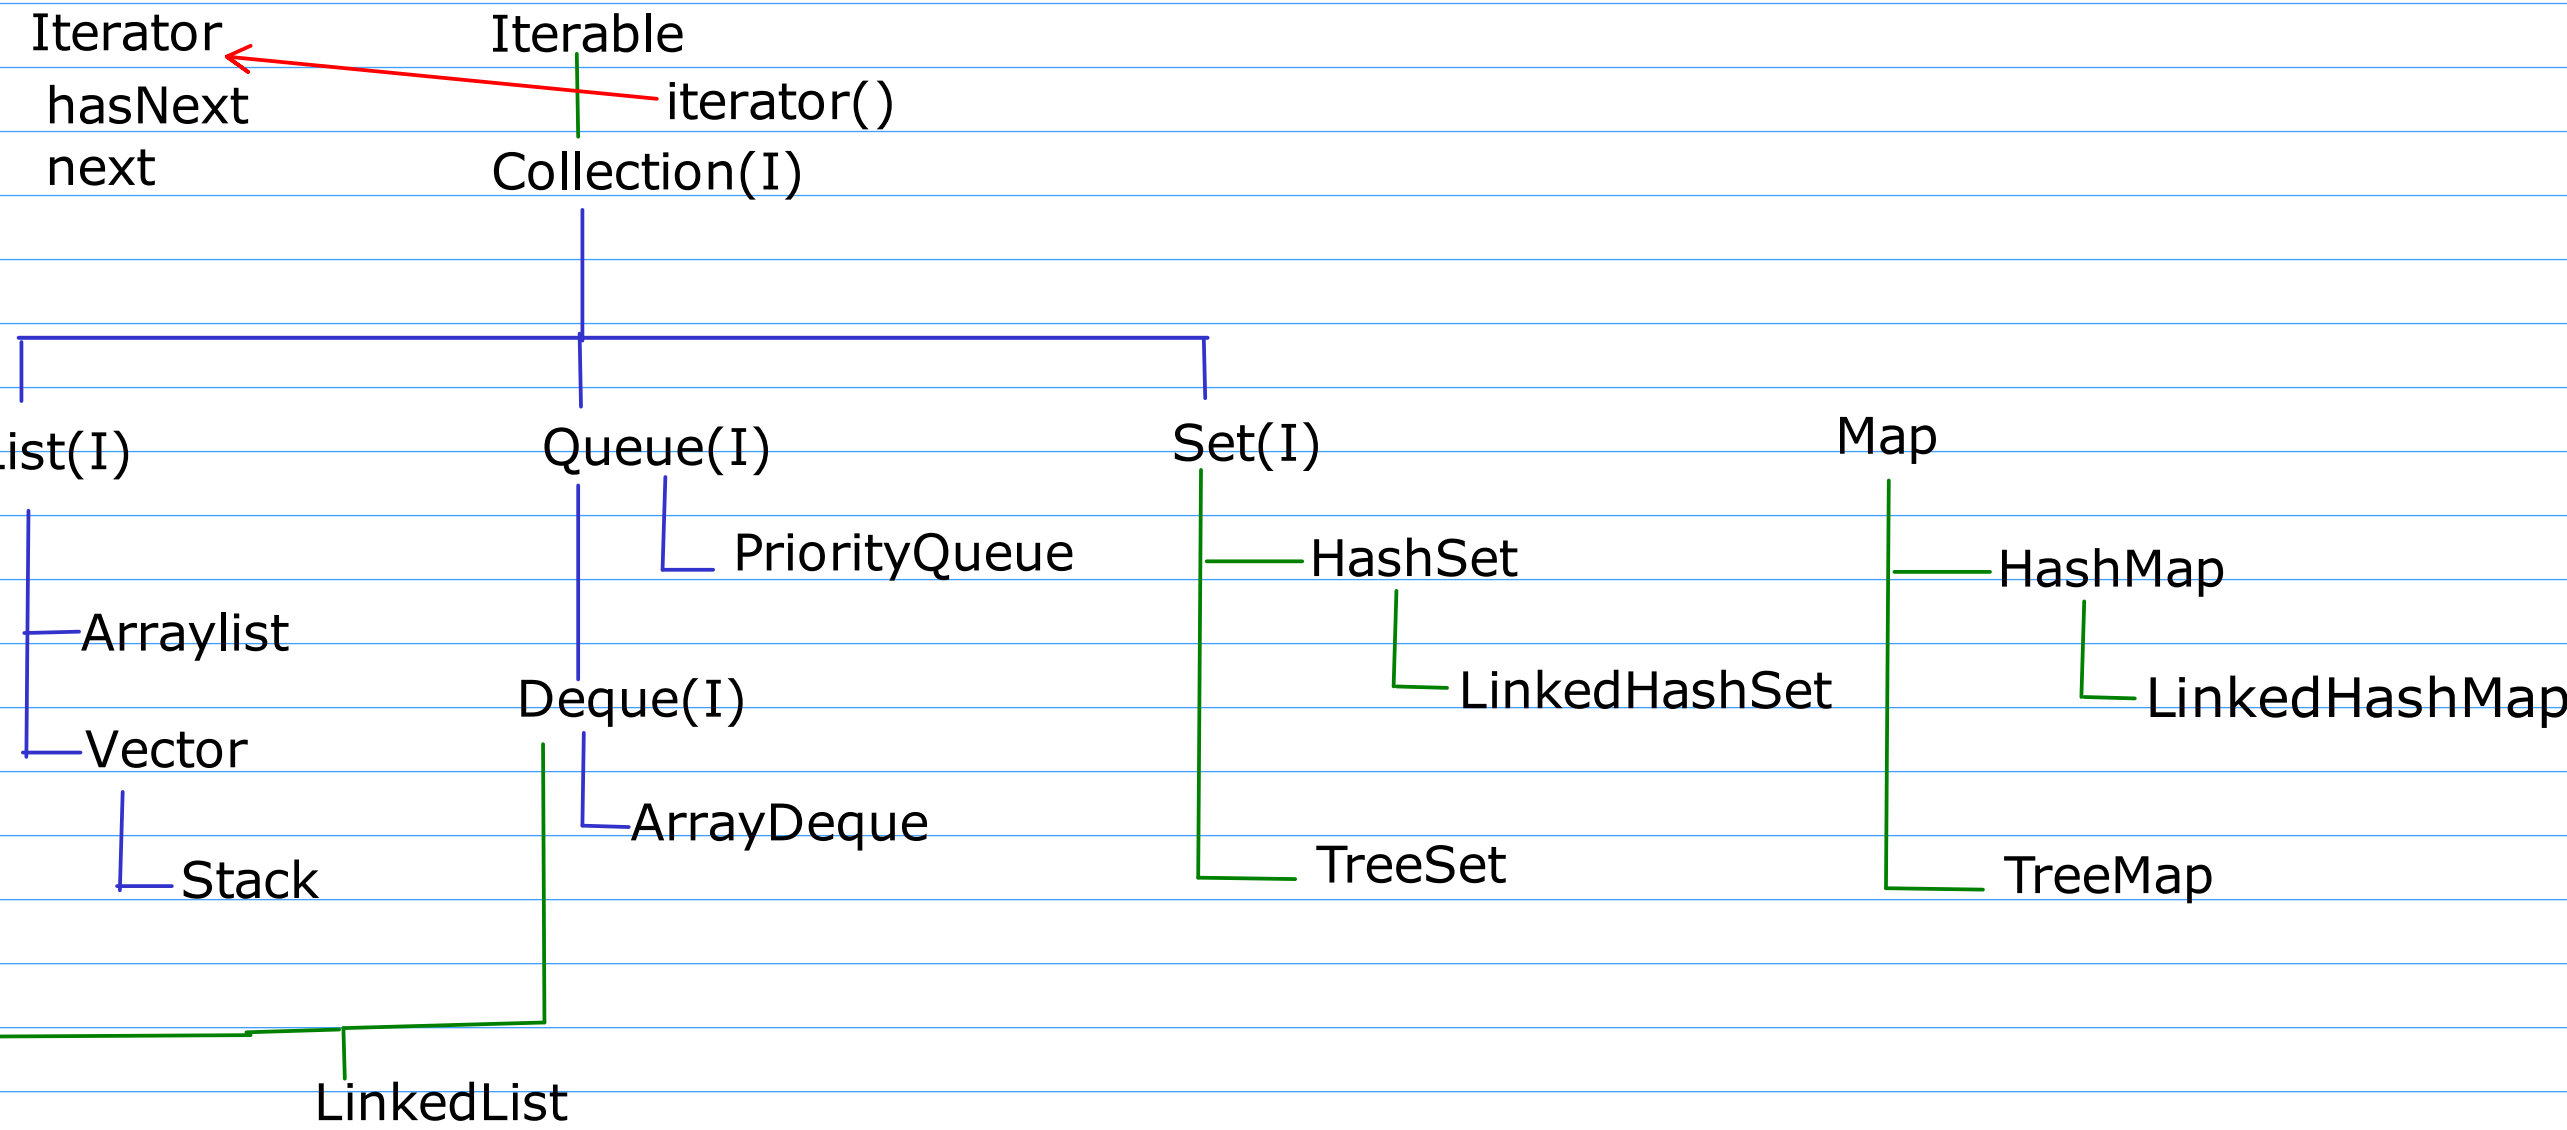

- # Comparable
- It is a generic interface declared in the java.lang package
 - It provides the protocol/specification to compare this object with the given object
 - It is used to provide natural ordering of elements

```
interface Comparable<T>{
    void compareTo(T o);
}
```

//this object with the given object
// used for natural oprdering of the elements

```
interface Comparator<T>{
    void compare(T o1,T o2);
}
```

// two given objects
// used for ordering of elements other than
natural order

Iterator
for-each
index based for-loop
Enumaration

Types of iterator

1. Fail fast iterator
2. fail safe iterator
